Professional Experience

New York, NY | July 2024 - Present

Full-Stack Software Engineer | SUI & Global Payroll Platform | Justworks

- Designed and delivered a Power of Attorney (POA) document workflow on the SUI team, automating compliance processes and saving 11,000+ operational hours annually (~\$300K cost reduction).
- Led end-to-end design and implementation of a high-performance rates processing tool with dynamic inline editing, scaling to 300,000+ customer rates and supporting \$50M+ in annual revenue.
- Transitioned to the Global Payroll Platform team to unify three distinct payroll systems (two domestic, one international) behind a standardized API layer, unblocking cross-functional product development.
- Engineered secure, high-throughput integrations across 8+ microservices (Ruby, Go, SQL), achieving 99%+ request success while handling 17M+ API requests per week.
- Authored architectural specifications, API contracts, and customer-facing documentation; presented system designs and demos to company leadership and engineering org.

Software Engineer Intern | Benefits Billing Team | Justworks

New York, NY

June 2023 - August 2023

- Designed and shipped a full-stack internal tool spanning frontend, backend, and testing.
- Deployed to production and adopted weekly by 4+ internal teams to access customer-critical data.

Software Engineer Intern | Employer Risk Team | Justworks

New York, NY

June 2022 - August 2022

- Modernized a legacy production script into a dynamic front-end tool with integrated backend and testing.
- Spearheaded 2 company-wide panels and led 2 high-impact intern hackathons, driving innovation.

Projects

Personal Portfolio Website | Three.js, React, Blender, CSS3DRenderer

- Architected and built an interactive 3D portfolio website using Three.js, rendering a custom Blender-authored scene directly in the browser.
- Developed two standalone applications—a 3D host and a 2D React interface—and integrated them via CSS3DRenderer and iframe embedding.

Stock Prediction Neural Network | Python, TensorFlow, Keras, Pandas

- Built an LSTM-based neural network for time-series forecasting, predicting the 5th trading-day close from historical price windows.
- Iterated on model architecture, feature window size, and evaluation metrics to improve prediction stability.

Education

The Pennsylvania State University, College of Engineering, University Park August 2020 - May 2024
Bachelor of Science in Computer Science | Minor in Business Administration GPA: 3.62

DIS: Copenhagen in Partnership with the University of Copenhagen Spring 2023
Artificial Neural Networks and Deep Learning

Professional Skills

Languages: Go, Ruby, Python, Java, JavaScript

Frameworks & Tools: React, Ruby on Rails / Sorbet, TensorFlow, Keras

Web & Other: HTML/CSS, REST APIs, Pandas

Fluent in Hebrew

Personal Interests

Mountaineering

Scuba Diving

Triathlon Training
